

PRODUCT OVERVIEW

Interior Designing & Marketplace Platform

Version 1.0 – Engineering Functional Specification

1. EXECUTIVE SUMMARY

The Interior Designing Platform enables customers to visualize real Interior products inside their actual spaces before making a purchase decision.

The platform combines:

- Room Photo Visualization
- Floor Plan Visualization
- Furniture Marketplace
- Vendor Management System
- AI-Powered Recommendations
- Lead Generation System

The goal is to reduce uncertainty in furniture purchasing and increase conversion rates for furniture vendors.

2. PROBLEM STATEMENT

Current furniture buying process suffers from:

Customer Problems

- Cannot imagine furniture in actual space
- Unsure about dimensions
- Fear of wrong purchase
- High decision-making time
- Difficulty comparing multiple products

Vendor Problems

- Low conversion rates
- Excessive customer inquiries
- High return rates
- Expensive showroom operations
- Limited customer visualization tools

3. SOLUTION OVERVIEW

The platform allows users to:

Method 1: Room Photo Visualization

Upload a room photograph.

AI detects:

- Walls
- Floor
- Perspective
- Scale references

User places furniture into the room.

Furniture is automatically scaled.

Result:

A realistic room preview.

Method 2: Floor Plan Visualization

Upload:

- JPG
- PNG
- PDF
- CAD export image

User enters dimensions if required.

System generates:

Scaled digital workspace.

User can:

- Place furniture
- Rearrange furniture
- Measure clearances
- Validate layouts
- Remove existing furniture

4. BUSINESS OBJECTIVES

Primary Objectives

- Increase furniture purchase confidence
- Increase vendor lead generation
- Reduce furniture returns
- Improve furniture discovery
- Create a scalable marketplace

Secondary Objectives

- Interior design assistance
- Vendor analytics
- Customer engagement
- AI recommendations

5. For Vendors

Vendors can upload their products and can list them in the catalogue.

- Upload 360 video of the product
- Upload Dimension.
- Upload the price.
- Upload the material specification.

Our software will convert the 360 to 3D.

6. Categories

For a comprehensive interior design visualization and marketplace platform,

Furniture

Living Room

- Sofas
- Sectional Sofas
- Recliners
- Coffee Tables
- TV Units

- Side Tables
- Console Tables
- Bookshelves
- Chairs

Bedroom

- Beds
- Headboards
- Bedside Tables
- Dressers
- Wardrobes
- Chest of Drawers
- Study Tables

Dining

- Dining Tables
- Dining Chairs
- Bar Stools
- Crockery Units
- Sideboards

Office

- Office Desks
- Office Chairs
- Meeting Tables
- Storage Units

Lighting

Ceiling Lights

- Chandeliers
- Pendant Lights
- Flush Mount Lights
- Semi-Flush Lights

Wall Lights

- Wall Sconces
- Picture Lights
- Accent Lights

Floor Lights

- Floor Lamps
- Reading Lamps

Table Lights

- Table Lamps
- Decorative Lamps

Smart Lighting

- Smart Bulbs
- Smart Strips

- Countertops

Home Improvement & Hardware

- Handles
- Hinges
- Drawer Channels
- Locks
- Door Accessories

Artwork & Luxury Decor

- Paintings
- Sculptures
- Designer Decor

- Collectibles

How does it work?

1.MANUALLY ADDING PRODUCTS IN PHOTO.

STEP 1: User will upload room image.

STEP 2 : User modify the room adding Furniture, Lights, Curtains, Flooring etc.

User have added ceiling lights.

User have added furniture.

User have changed the flooring.

User have added curtains.

User have added photo frame.

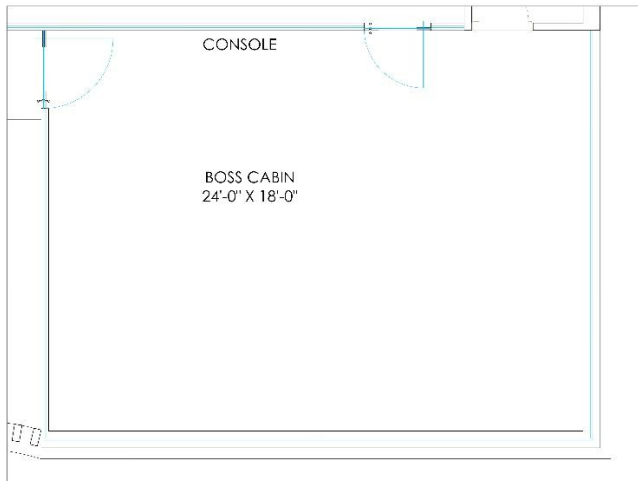

User can give any prompt to highlight the wall in any material from our library and AI will design the wall as per the given prompts.

Notes:

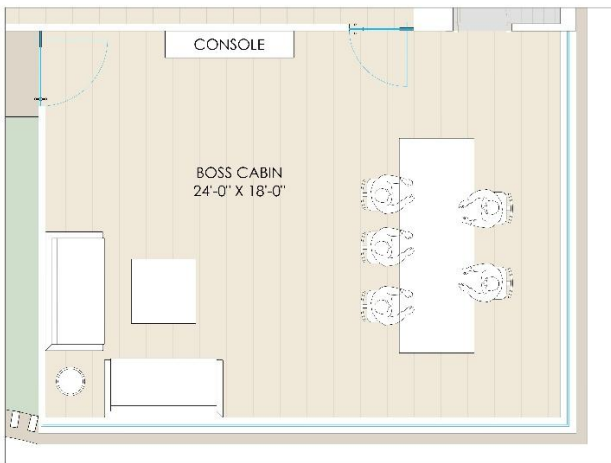

- There will be a drop down in which budget will be added just like the cart after every product is been added.
- **Feature** of rendering in must as already discussed in POC Stage.

2.MANUALLY ADDING PRODUCTS IN PLAN.

STEP 1: User will upload the plan

STEP 2: User add furniture.

STEP 3 : AI create 3D and renders.

3. AI WILL DESIGN DO EVERYTHING

STEP 1: USER WILL UPLOAD THE PHOTO OF A ROOM.

User will give the requirements and the budget and AI will create the design taking the products from our market place.

STEP 2: USER WILL GET DIRECTLY THE RESULT.
